<i>Features:</i>				
Side-mounted chain tensioning				
Decompression valve				
Tool-free fuel caps				
2-MIX engine				
- The two-stroke engine with 2-MIX technology saves up to 20 % of fuel and reduces emissions by up to 70 % compared to 2-stroke engines of the same performance class without 2-MIX technology.				
Compensator				
- This controller in the carburettor prevents the fuel-air mixture getting richer as the air filter becomes clogged. The correct quantity of fuel is delivered to the carburettor depending on the quantity of air passing through the air filter.				
- This keeps the fuel/air ratio in the combustion mixture constant and hence also the engine power. The filter doesn't need to be cleaned until an appreciable drop in power occurs.				
Anti-vibration system				
Precisely calculated buffer zones minimise the transfer of engine and saw chain vibrations to the front and rear handles. The chainsaw therefore runs noticeably smoother. This allows the user to save their strength and work longer.				
Ematic System				
Compared to conventional bars without Ematic, the Ematic system reduces the consumption of chain lubricant by up to 50 %, depending on the type of wood and the cutting attachment used.				
This system comprises a Ematic or Ematic S guide bar, an Oilomatic saw chain and a variable-flow or reduced-flow oil pump. As a result, virtually every drop of chain lubricant is delivered to exactly the right spot.				
Single-lever master control				
All important functions such as start, choke, throttle and stop are operated via a single lever.				
<i>Accessory:</i>				
Chainsaw case				
For storage and transport of all battery-powered and petrol chainsaws with bar lengths up to 45 cm.
