Oilomatic saw chain type: 3/8" P				
Saw chain pitch: PM3				
Hardwearing and powerful chainsaw with a great power-to-weight ratio.				
<i>Features:</i>				
Carburettor heating (V)				

By changing the chain saw from summer to winter operation, the intake air is pre-heated over the engine fins. This ensures that the carburettor does not ice up and you can continue working in freezing temperatures.				
Tool free fuel caps				
Special caps to open and close the tank cap quickly, easily and without tools.				
Anti-vibration system				
Precisely calculated buffer zones minimise the transfer of engine and saw chain vibrations to the front and rear handles. The chainsaw therefore runs noticeably smoother. This allows the user to save their strength and work longer.				
Ematic System				
Compared to conventional bars without Ematic, the Ematic system reduces the consumption of chain lubricant by up to 50 %, depending on the type of wood and the cutting attachment used.				
This system comprises an Ematic or Ematic S guide bar, an Oilomatic saw chain and a variable-flow or reduced-flow oil pump. As a result, virtually every drop of chain lubricant is delivered to exactly the right spot.				
Single-lever master control				
All important functions such as start, choke, throttle and stop are operated via a single lever.				
Accessory:				
Chainsaw case				
For storage and transport of all battery-powered and petrol chainsaws with bar lengths up to 45 cm.
