Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines,

National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.
- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special

Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.

- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

INTRODUCTION

The CAAP Board of Directors has approved the Annual Procurement Plan (APP) of the Civil Aviation Authority of the Philippines for CY-2024 which includes among others the supply and delivery of SCBA Compressor at various airports.

At present, majority of CAAP fire stations lacks the capability of refilling their SCBA tanks. Once the air from the tanks is depleted, this limits the capability of our firefighters to perform firefighting operations under harsh conditions.

CAAP cannot jeopardize the safety of ARFF personnel during actual emergency. With the demand for personnel safety, we cannot send firefighters to conduct rescue and firefighting operations with limited respiratory protection. ARFF needs to refill the SCBA tanks during emergency operations; in doing so, individuals may be able to avoid respiratory issues and other health problems caused by exposure to smoke and other hazardous substances.

Hence, the procurement of SCBA Compressor is essential, not only to comply and meet the standards prescribed by the International Civil Aviation Organization (ICAO) but primarily to live up with the primary objective of rescue and firefighting services “to save lives in the event of aircraft accident or incident”. (*Airport Services Manual Part 1, Chapter 8 – Rescue and Firefighting*)

Likewise, the acquisition of SCBA Compressor provides an opportunity to consider its importance during training but also its contribution as a fire protection equipment specially designed to supply fresh air to ARFF personnel during aircraft emergency.
