

DATE 11 DEC 2024

MEMORANDUM CIRCULAR: 031-2024

TO : ALL CAAP AIS STAKEHOLDERS

FROM : OIC, OFFICE OF THE DIRECTOR GENERAL

SUBJECT : ELECTRONIC AERONAUTICAL INFORMATION PUBLICATION (eAIP)  
IN PDF FORMAT AND THE PHILIPPINE AIS WEB SERVICES

The eAIP concept was developed to enhance and standardize the use of automation in Aeronautical Information Service (AIS) and gradually phase out the use of paper elements. It allows for the consistent display of aeronautical information when provided electronically by Philippine AIS.

Effective December 26, 2024, a PDF version of the Philippine Aeronautical Information Publication (AIP) will be available online on the new AIS website <https://ais.caap.gov.ph>.

#### System Requirement

The new AIS website can be viewed on any existing web browsers.

#### Notice to Website User

The implementation of the eAIP in PDF format is a significant step towards modernizing and improving the accessibility and usability of AIP information.

All possible measures have been undertaken to ensure that the aeronautical data and aeronautical information provided on the AIS website is accurate and complete.

Furthermore, the NOTAM feature of the new AIS website is still under development.
